

Embossed paper for poultry

DESCRIPTION

Poultry use in liners of boxes (plastic or cardboard) for transport of chicks, turkeys, quail, etc. Very suitable due to its absorption capacity, keeping the animals dry during travel and acting as thermal insulation to maintain the temperature. Also suitable for use as liners of rearing cages, since the embossed relief retains the food on the paper, increases the sound of the feet and acts as a thermal barrier. It is also used as a thermal mat in the swine farrowing crates and in the domestic rabbit sector for transport of young rabbits. It is delivered in formats cut to the measurements requested by the client.
