
Industrial embossing

DESCRIPTION

The paper embossed on its honeycombed surface acts as cushioning protection from impacts, being an ideal product for packaging and transporting of fragile merchandise such as porcelain, tiles, crystal, crystal bottles, mechanical pieces, etc., protecting the products inside the boxes. The embossed paper can substitute the plastic packaging, representing an ideal solution from the economic and ecological point of view, 100% recycled and recyclable. Embossed paper quality of 80 to 400 g. Cream coloured. Possibility of colours. It is delivered in formats cut to the measurements requested by the client.
